Cover Letter

Dear Hiring Manager,

I am writing to express my interest in the Front End Web Developer position advertised on work.ua by your company. As a computer science undergraduate student with a strong passion for web development, I am confident that I possess the necessary skills and knowledge to be a valuable addition to your team.

I have developed several projects during my studies, most of which are fully responsive websites built with HTML, CSS, and JavaScript. Through these projects, I have gained hands-on experience with various front-end technologies such as Vite and TailwindCSS. I am eager to apply my skills and knowledge to real-world projects and contribute to the success of your organization.

Apart from technical skills, I have also developed soft skills such as problem-solving, communication, and teamwork. In group tasks, I successfully solved a challenging problem by finding a suiting algorithm for the situation at hand. Additionally, I have improved my communication skills by presenting a lot on different topics to my groupmates, as well as receiving and giving feedback.

I understand the importance of a clean and functional design in web development, and I strive to create websites that are visually appealing and easy to navigate. I am also aware of the importance of writing clean and efficient code to ensure the website's optimal performance.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further and learn more about the Front End Web Developer position at your organization.

Sincerely,

Onyshchenko Oleh

P.S. I would be happy to provide more information during an interview and demonstrate how my skills can contribute to the success of your organization.
